Subject: USGS/EPA meeting follow up
Pavilion Review 2v3 DRAFT.pdf

Wanted to send a quick note of thanks for meeting with us last Thursday and offering very thoughtful presentations as well as offering to follow up on the sample collections with my technical folks.

As the year ends, know that I'm appreciative of all the efforts both EPA and USGS have made to bring API and its member companies into the process. I firmly believe that the interaction and tone of the interactions over this year have moved in a marked positive direction. I hope that you feel the same way of your industry interactions. Attached to this email is the "Draft" document we spoke about that we are putting together with our list.

Happy New Year, and all the best in 2013 to you and your family!
